Anton Kozionov

Product owner & product designer

Open to senior or founding product designer roles · remote EU · B2B contract · available in 2–4 weeks · no visa sponsorship needed (EU)

Kraków, Poland · hi@kodsgn.com · linkedin.com/in/kodsgn · kodsgn.com

SUMMARY

I've designed digital products since 2020, across fintech, SaaS and health tech, usually as the only designer on the team, so I also made product decisions. At cashtime I joined the founding team, and since 2023 I've been its only product owner and product designer, running the backlog for a team of about six.

I wanted to make an app of my own for years. I kept coming up with ideas, studios and partners, and none of it got anywhere. Now I finally build them with Claude Code, outside working hours: RIPEN, Soma and Bukvyk. I do the research, design and decisions. AI agents write the code, and I check what they build.

EXPERIENCE

2026–now — **Founder, designer · Own products**
RIPEN, Soma, Bukvyk — built by directing AI agents; Bukvyk and RIPEN live on both stores, Soma in App Store review

2023–now — **Product owner & product designer · cashtime**
Fintech: the only PO, team of ~6, backlog in ClickUp; app, website, brand, AI bot

2022–25 — **Product designer, founding team · Keyword Insights**
SaaS: web app, landing, SEO content workflow, product videos

2023–24 — **UI/UX designer · Ediens**
Health tech: ordering online lab tests and diet plans

2023 — **Product designer · Aviation Data Solutions**
SaaS: web app for airport operations

2022–23 — **Product designer · Soula**
Health tech: AI app for pregnant women and new mothers

2020–23 — **Industrial designer · ARTKB**
Industrial design, technical docs and 3D for hardware makers

2020–22 — **Co-founder, product designer & PM · Elekomp**
E-commerce built from scratch with 1C inventory; led dev and content teams

2019–20 — **Graphic designer · KRT TV**
On-air graphics, intros and programme branding

SELECTED WORK

2023–now	**cashtime** Car-collateral loan app where I'm the only product owner and designer. I designed it and run the backlog for a team of about six.
2026	**RIPEN** A habit tracker that grows one tree for your whole life: from research to a Google Play submission in six weeks
2026	**Soma** Reads lab reports on the phone and charts every marker. An on-device AI explains results but doesn't diagnose.
2026	**Bukvyk** Reading app for Ukrainian kids, based on literacy research. Live on iOS and Android; 252 schools opened the free classroom version.
2022–25	**Keyword Insights** Took an AI SEO tool from spreadsheets to a product: one design system for about ten features, and a new onboarding.

EDUCATION

2025–26	**Product Design course** Projector Creative & Tech Online Institute · certificate
2020	**MA, Graphic Design (with honours)** Kyiv State Academy of Decorative and Applied Arts and Design
2018	**BA, Industrial Design (with honours)** National Transport University, Kyiv

SKILLS

- Product ownership: discovery, prioritisation, backlog (ClickUp), working with engineering and QA
- Product & UX design: research, information architecture, flows, UI, design systems, prototyping
- Building with AI agents: Claude Code, agent-based audits and QA, design-to-code
- Figma, Adobe (Photoshop, Illustrator, After Effects); Blender, Webflow, WordPress when needed
- Branding and motion design
